

Omar Saad

SOFTWARE ENGINEER — FULL-STACK & SYSTEMS

omarisadev@gmail.com | +201128671408 | Alexandria, Egypt | [Portfolio](#) | [GitHub](#)

Professional Summary: Product-minded Software Engineer specializing in TypeScript, React, Next.js, and HTTP API integrations, alongside hands-on CI/CD and systems engineering experience . Passionate about AI-native workflows—actively leveraging LLMs and code assistants to accelerate feature delivery, generate unit tests, and streamline developer tooling while verifying outputs through first-principles reasoning . Experienced in shipping end-to-end features, optimizing web performance, and collaborating effectively in remote teams .

CORE COMPETENCIES & TOOLING

Languages & Core: TypeScript (Advanced), JavaScript (Advanced), Node.js, HTML5/CSS3, REST APIs, HTTP protocols .

Frontend & UI: React.js, Next.js (App Router), TailwindCSS, Shadcn UI, Vue.js, Framer Motion .

AI Workflow & Testing: AI-assisted coding (LLMs/Copilot), test verification, Git version control, Figma .

CI/CD & Infrastructure: GitHub Actions (CI/CD), REST Webhooks, Proxmox VE, OPNsense, Nginx Proxy Manager, Linux Administration .

WORK EXPERIENCE

OpenSyntax — Fullstack Developer, Lead Developer 12/2024 - Present

- Lead a cross-functional team of 4 developers to build and maintain responsive web interfaces for diverse client projects .
- Translate UI/UX specifications into clean, maintainable TypeScript code for production-ready applications .
- Utilize AI coding assistants to accelerate boilerplate generation, verifying outputs with strict code reviews and performance profiling .
- Debug and resolve complex frontend performance issues across various devices and browsers .

Freelance — Full-Stack Developer 08/2024 - 01/2025

Remote

- Engineered responsive web interfaces for an HRMS application using Next.js and Shadcn UI, establishing reusable component systems .
- Collaborated with client stakeholders to scope simple, pragmatic solutions and deliver web features end-to-end .
- Built high-performance landing pages with React.js and TailwindCSS, ensuring accessibility and mobile responsiveness .

PROJECTS

beststemcellturkey.com — Headless Web Platform & Automation 01/2026 - 04/2026

Front-End Developer

- Architected a statically generated Next.js (App Router) web application decoupled from a Headless WordPress backend .
- Engineered automated CI/CD deployment pipelines using GitHub Actions, configured to trigger server rebuilds dynamically via custom REST webhooks .
- Developed dynamic JSON-LD schema generation (MedicalBusiness, FAQPage) with Next.js Middleware and Server Components, achieving zero-error Google Search Console validation .

Good-Guys E-Commerce — Lead Developer 03/2025 - Present

- Built a high-performance e-commerce platform using Next.js 14, TypeScript, and Server Actions to minimize client-side overhead .
- Optimized Core Web Vitals and SEO performance, reaching near-perfect Lighthouse scores for accessibility and speed .

UltimateXO.com — Real-Time Web Application

Front-End Developer

- Collaborated with backend engineers to implement real-time multiplayer functionality with low-latency state management .

Personal Systems & Homelab — First-Principles Infrastructure Self-Hosted

- Architected a self-hosted Linux/Proxmox VE hypervisor host (24GB RAM) managing isolated LXC/Docker services (Home Assistant, Samba, media) .
- Configured PCIe passthrough (IOMMU) for an NVIDIA Quadro P4000 GPU to enable NVENC hardware acceleration .
- Deployed an OPNsense firewall router with AdGuard Home, configuring pure IP routing across subnets to enable direct non-NAT connection requests .
- Managed Nginx Proxy Manager (NPM) with DuckDNS for automated SSL certificate provisioning and reverse proxying .
