

Omar Saad

Frontend Engineer

✉ omarisadev@gmail.com ☎ +201128671408 📍 Alexandria, Egypt

Professional Summary

Frontend-focused Full-Stack Developer specializing in React, Next.js, and TypeScript. Expert in building responsive, high-performing web applications and translating UI/UX designs into clean, maintainable code.

- Developed and deployed production-ready responsive websites using React.js, Next.js, and TailwindCSS with cross-browser compatibility
- Proficient in HTML, CSS, JavaScript, and Git version control
- Delivered pixel-perfect implementations from Figma designs with consistent code quality
- Strong problem-solver experienced in debugging and optimizing frontend performance across devices

Work Experience

Fullstack Developer, Lead Developer

12/2024 - Present

OpenSyntax

- Lead a cross-functional team of 4 developers to develop and maintain responsive web interfaces for diverse client projects, ensuring modern aesthetics and technical excellence
- Translate UI/UX requirements into clean, maintainable code for multiple production-ready sites, focusing on user-friendly experiences
- Debug and resolve frontend issues across browsers and devices, maintaining high-quality standards throughout the development lifecycle
- Collaborate with team members during code reviews and project meetings to implement best practices in frontend development

Full-Stack Developer

08/2024 - 01/2025

Freelance

Remote

- Developed responsive web interfaces for an HRMS application using Next.js, focusing on user-friendly design and accessibility standards
- Implemented Shadcn UI component library to establish a consistent, accessible design system, writing reusable and testable code
- Engineered two high-performance landing pages using React.js and TailwindCSS, ensuring mobile responsiveness and cross-browser compatibility through thorough testing and debugging
- Participated in client meetings to gather requirements and translate design specifications into functional frontend features

Web Developer

01/2024 - 07/2024

Prodigy InfoTech

Remote

- Developed and deployed 4 distinct responsive websites using React.js and TailwindCSS, strictly adhering to project requirements and design specifications
- Wrote clean, maintainable code with focus on frontend performance optimization and component reusability across multiple projects
- Debugged and resolved frontend issues to ensure consistent user experiences across different browsers and devices
- Recognized for technical proficiency and attention to detail, receiving a formal Letter of Recommendation upon completion

Projects

Good-Guys E-Commerce

03/2025 - Present

Lead Developer

- Developed a high-performance web application using Next.js 14 and TypeScript, focusing on responsive design and seamless user experiences
 - Implemented Server Actions for efficient data fetching and state management, reducing client-side overhead
 - Designed a minimalist UI utilizing Tailwind CSS and Framer Motion to ensure high engagement and modern aesthetic standards
 - Optimized SEO and Core Web Vitals, achieving near-perfect Lighthouse scores for accessibility and performance
-

beststemcellturkey.com

01/2026 - Present

Front-End Developer

- Architected a Headless CMS Platform: Built a highly performant, statically generated web application utilizing Next.js (App Router) and React, fully decoupled from a Headless WordPress backend
 - Engineered CI/CD Automation: Designed and implemented a fully automated deployment pipeline using GitHub Actions, configured to trigger server rebuilds dynamically via custom REST webhooks upon backend content updates
 - Advanced Technical SEO & Data Structuring: Developed dynamic JSON-LD schema generation (MedicalBusiness, FAQPage, BreadcrumbList) using Next.js Middleware and Server Components, resolving complex layout hydration overlaps to achieve a zero-error Google Search Console validation
-

UltimateXO.com

Front-End Developer

- Collaborated with a backend engineer to implement real-time multiplayer functionality, ensuring low-latency state management
-

Exodia OS Website

Front-End Developer

- Revamped the UI/UX to ensure a fully responsive, pixel-perfect design, significantly improving mobile accessibility and visual hierarchy
